

## **KISTI Grid Certificate Authority**

# Installing Web Access Client Certificate

Notification !

WACC certificate is a client certificate for your web browser to access to the online certificate request web site provided by KISTI GRID CA.

WACC certificate itself is not a GRID certificate of KISTI GRID CA.

**Double-click the client.p12 to install it.**

**Input your PIN number as the password.  
You wrote down the PIN number in the application form.**

You don't need to check the 'Enable strong private key protection...' check box.

The image shows a Windows dialog box titled "Certificate Import Wizard". The window has a blue title bar with a close button (X) in the top right corner. The main content area is light gray and contains the following text and controls:

- Password**  
To maintain security, the private key was protected with a password.
- 
- Type the password for the private key.
- Password:  
[A text input field containing ten asterisks (\*\*\*\*\*).]
- Enable strong private key protection.** You will be prompted every time the private key is used by an application if you enable this option.
- Mark this key as exportable.** This will allow you to back up or transport your keys at a later time.
- 
- At the bottom right, there are three buttons: "< Back", "Next >", and "Cancel".
